

KIOSK

THE REVOLUTION OF THE PERSONALIZATION

KIOSK

This is a new platform that complements and speeds up the personalisation of images on objects. With this kiosk, you can print trainers, T-shirts, bottles, mobile phone cases or notebooks, among other items.

This kiosk is a new solution for the personalisation business and is intended for both point-of-sale and e-commerce.

CHARACTERISTICS

 Touch screen

 Barcode and QR detector

 Own editor

 Coin returner

 Cash acceptor

 Receipt printer

It is completely tactile and has a QR code reader to upload our images directly from the mobile, as well as a 3D viewer in which the image adapts to the texture to see the real effect. It also has an editor to modify the typography, size and colour.
